

Arnold Schwarzenegger, Governor

STATE CLEARINGHOUSE

NEWSLETTER

August 1-15, 2006

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **August 1-15, 2006.**

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown.**

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

Governor's Office of Planning and Research State Clearinghouse

Date: December 5, 2003

To: All CEQA Lead Agencies

From: Terry Roberts, Director, State Clearinghouse

Re: Submission of Electronic CEQA Documents to State Clearinghouse

In order to take advantage of the cost and time savings associated with electronic documents, the State Clearinghouse will accept electronic documents under the following conditions:

1. Electronic documents shall be on CD, and the file format shall be either Adobe PDF or Microsoft Word.
2. For EIRs, each CDs must be accompanied by a printed copy of the Executive Summary. This allows the State Clearinghouse and the reviewing agencies to efficiently route the document to the proper persons.
3. Negative Declarations and Mitigated Negative Declarations will not be accepted on CD. However, any separately bound technical appendices to the document may be submitted on CD.
4. For certain projects, particularly large infrastructure projects such as airport expansions, the State Clearinghouse may request a certain number of hard copies. In addition, the lead agency shall honor a special request from a responsible or trustee agency which requires a hardcopy for purposes of review and comment.
5. This policy does not invalidate CEQA Guideline §15205, which requires a public agency submitting printed documents to the State Clearinghouse to send, in addition, an electronic copy of the document, *if available*.

If you have any questions regarding the submission and circulation of environmental documents, please contact the State Clearinghouse at (916) 445-0613 or state.clearinghouse@opr.ca.gov.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
1999 through 2005**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

2005101029	<p>Pan-Pacific Fisheries Cannery Buildings Demolition Los Angeles City Harbor Department Los Angeles, City of--Los Angeles</p> <p>The proposed project consists of the demolition of two buildings in the Fish Harbor area of the Port of Los Angeles. The two buildings constitute a complex determined to be eligible for listing on the National Register of Historic Places. The buildings, once owned by Pan-Pacific Fisheries Cannery, were used for fish processing and canning.</p>	EIR	09/14/2006
2006031112	<p>North Apple Valley Specific Plan Apple Valley, City of Apple Valley--San Bernardino</p> <p>The Specific Plan will provide development standards and guidelines for the ultimate development of a 4,937 acre industrial park, to include a range of permitted and conditionally permitted industrial uses, as well as commercial support services and retail facilities.</p>	EIR	09/14/2006
2006022099	<p>SRJC Doyle Student Services Center Replacement Project Santa Rosa Junior College District --Sonoma</p> <p>A draft facilities program for the SRJC's replacement Student Services Center was produced by BSA Architects in September 2005. The program indicates a three-story building of approximately 70,000 square feet. The new building will be constructed at the site of the existing Doyle Student Center, which will be demolished to make way for the new structure. The footprint of the new building will likely shift slightly to the east. Exterior features will complement existing adjacent buildings (new library and Pioneer Hall). The project footprint is sited to retain the significant oak trees to the north of the existing student center. The small parking lot (33 spaces) to the east of the existing Student Center will be demolished to accommodate the new Student Services Center. Parking will be offset by the new parking garage under construction.</p>	MND	08/30/2006
2006081002	<p>PM61706/03-070 North Side of Sierra Highway and 500 Feet West of Red Rover Mine Road, Acton, CA Los Angeles County Department of Regional Planning --Los Angeles</p> <p>The proposed project is an application for a Tentative Parcel Map to subdivide the subject parcel for four residential lots ranging from 5.23 acres to 5.28 acres and one remainder lot of 11.4 acres. Development is not proposed at this time, however, future development will require the construction of water wells and septic systems. Easements for private and future streets A and B on the north and west borders of the project site will be dedicated for public use. Project site takes access from Sierra Highway.</p>	MND	08/30/2006
2006081006	<p>Twin Lakes Pump Station Expansion and Emergency Pipeline Connection Project Las Virgenes Municipal Water District Los Angeles, City of--Los Angeles</p> <p>The proposed project involves the concurrent development of (1) the expansion of the LVMWD Twin Lakes Pump Station, (2) the installation of a 10-inch pipeline between the pump station and a meter vault, (3) the installation of a 14-inch intertie pipeline between the meter vault and 30-inch pipeline at Devonshire Street and Valley Circle Boulevard, and (4) the replacement of an eight-inch pipeline with</p>	MND	08/30/2006

	a 12-inch pipeline between the meter vault and West Valley Feeder No. 2, located approximately 180 feet to the southeast of the project in Chatsworth Park South.		
2006082001	American Canyon Housing Element Update & Initial Study/Negative Declaration American Canyon, City of American Canyon--Napa The City of American Canyon has an obligation to accommodate 564 lower income, 470 moderate income, and 683 above moderate income "fair share" residential units via an agreement between the City of American Canyon, Napa County, and the California Department of Housing and Community Development as authorized by ABAG and provided for in Government Code Section 65584 (c)(5). Within the RO District, the amount of residential in the CC and CN commercial districts will allow densities of 20 units per gross acre for CC and CN parcels west of Route 29 at 50% site coverage and 35 units per gross acre for parcels east of Route 29 at 60% site coverage. Thirty proposed parcels compose Sites 1-11. This Initial Study analyzes these sites for significant environmental effects. All the sites are either vacant or contain single-family residential structures or small-scale commercial establishments.	MND	08/30/2006
2006082002	A Request to Subdivide 1.57 Acres into 32-Lots for Construction of Townhomes Contra Costa County Martinez--Contra Costa The applicant, Loving and Campos Architects, Inc., proposes to subdivide 1.57 acres into 32 lots for construction of townhomes. All on-site trees are proposed for removal. The project application includes a front yard variance for 20' (where 25' is required) and a height of 35' (where 30' is required).	MND	08/30/2006
2006082003	Almond Estates Subdivision Colusa County --Colusa The proposed project is a request to seek a general plan amendment, zoning amendment, planned development overlay, and a Tentative Subdivision Map on 5.9 acres. Presently, the project site has a general plan land use designation of Rural Residential (RR) and a zoning district of Rural Residential (R-R) which allow for single family residences on minimum one acre lots. The applicant is requesting the general plan land use designation be amended to urban Residential (UR), and the zoning district be amended to R-1-6 (Single Family Residential, 6,000 sq. ft. lots with public services). The applicant is also applying for a Planned Development overlay zone in order to provide for lot sizes less than the zone's minimum, and for other specific considerations, such as reduced setback requirements. The proposed Tentative Subdivision Map will divide the site into 23 lots ranging in size from 4,941 square feet to 6,981 square feet. The western portion of the site along Salt Creek as well as two portions along Almond Avenue on the east will remain undivided and undeveloped. The proposed project also includes the construction of all onsite and offsite public infrastructure required to save the site.	MND	08/30/2006
2006081003	Oceano Dunes State Vehicular Recreation Area (SVRA) Southern Boundary Fence Replacement Parks and Recreation, Department of Arroyo Grande--San Luis Obispo The project will replace the weather-deteriorated southern boundary gate and fence at Oceano Dunes SVRA to prevent vehicle trespass into sensitive habitats as mandated by the California Coastal Commission and the unit resource	Neg	08/30/2006

	management plan.		
2006081004	New Site 24e Elementary School Project Adelanto School District Victorville--San Bernardino The District proposes to construct a new K-8 school and a future high school on 79 acres of vacant Desert land to meet expected enrollment growth due to projected new residential development. The site is within a described area of San Bernardino County, State of California, northwest of Mojave Drive and Joshua Road in Victorville.	Neg	08/30/2006
2006081005	Renewal of Waste Discharge Requirements (WDRs) for Injection of Treated Groundwater Regional Water Quality Control Board, Region 7 (Colorado River Basin), Palm Desert --San Bernardino PG&E is conducting investigative and remedial activities at the Topock Compressor Station under the oversight of the California Environmental Protection Agency, Department of Toxic Substances Control, as well as the U.S. Department of the Interior, U.S. Bureau of Land Management, U.S. Fish and Wildlife Service, and U.S. Bureau of Reclamation. On-going remedial activities include Interim Measures (IM) No. 3, which involves the extraction, treatment, and management of groundwater with the objective of maintaining hydraulic control of a hexavalent chromium plume in groundwater. Associated IM No. 3 facilities include groundwater extraction wells, a water treatment system, conveyance piping, injection wells, and monitoring well facilities.	Neg	08/30/2006
2006082004	Zinfandel Place Rancho Cordova, City of Rancho Cordova--Sacramento The project proposes to construct one new 3-story office/retail building and one new 1-story retail building over a parking garage with related surface parking, landscaping and utilities. The project would include approximately 66,635 square feet of commercial development on the 3.73 net-acre site. The project would also include corner monument signs, typical retail and office signage and blade wall signage.	Neg	08/30/2006
1990030403	Williams Ranch Precise Plan Salinas, City of SALINAS--MONTEREY Water supply wells and related infrastructure.	NOD	
2003021106	Agcon Sand and Gravel CUP/Reclamation Plan San Bernardino County --San Bernardino CJR Partnership (Permittee) proposes to expand an existing mining claim which will encompass 120 acres. The project to be approved consists of a 120-acre sand and gravel mine that would operate for 50 years during which time approximately 350,000 to 500,000 tons of material will be extracted each year. The project will result in impacts to desert tortoise (<i>Gopherus agassizii</i>) and Mohave ground squirrel (<i>Spermophilus mohavensis</i>), which are protected under the California Endangered Species Act, requiring issuance of a California Incidental Take Permit.	NOD

<u>Documents Received on Tuesday, August 01, 2006</u>			
2004072005	Diablo Water District Glen Park Well Utilization Project Diablo Water District Oakley--Contra Costa Development of a groundwater well to supply up to 2 million gallons per day, a 3.5 mile-long, 18-inch pipeline, and a water blending facility to mix groundwater and treated surface water.	NOD	
2005031010	Lake Perris Pollution Prevention and Source Protection Program Metropolitan Water District of Southern California Perris, Moreno Valley--Riverside The Lake Perris Program consists of two projects to improve water quality and ensure access to stored water at Lake Perris, an element of State Water Project, near Riverside. The two projects are: (1) Dissolved Oxygen Enhancement Project and (2) Pathogen Reduction Project. The objective of these projects is to expand the ability to withdraw water for drinking water purposes utilizing the full range of lake depths. The Dissolved Oxygen Enhancement Project is necessary because there is considerably less flexibility to withdraw good quality water during the summer due to the low dissolved oxygen levels. The proposed aeration system using pure oxygen will increase the availability of good quality water and ensure that a backup supply to the Skinner and Mills service area is maintained. Completion of plans and specifications for the dissolved oxygen system will enable progress to be made to ensure access to Lake Perris supplies. The Pathogen Reduction Project will investigate the need and, if warranted, design water quality improvements that would reduce the risks of pathogens associated with body contact recreation at the reservoir.	NOD	
2005101086	U.S. Army Corps of Engineers (Corps) Opportunistic Beach Nourishment Regional General Permit 67, 401 Water Quality Certification State Water Resources Control Board --San Luis Obispo The Regulatory Branch of the Corps', Los Angeles District (LAD), proposes to streamline the Regulatory procedures in place for permitting beach nourishment activities subject to the Corps' authority under Section 404 of the Clean Water Act (CWA) and Section 10 of the Rivers and Harbors Act. LAD proposes to establish Regional General Permit No. 67 (RGP 67) whereby projects meeting Special Conditions may proceed under a project-specific LAD Notice to Proceed. All other projects, or those receiving significant comments from public agencies, would require a Standard Individual Permit. A State Water Quality Certification action by the State Water Resources Control Board (State Water Board) on RGP 67 will be taken. Section 401 of the CWA requires that any activity requiring a federal permit or license, which may result in a discharge of pollutants into waters of the United States, requires certification by the appropriate agency. The State Water Board is the certifying agency for projects that apply to more than one Regional Water Quality Control Board area, such as the proposed RGP 67.	NOD	
2006032044	Emerald Bay Cable Project Parks and Recreation, Department of South Lake Tahoe--El Dorado Sierra Pacific Power Company and AT&T (formerly known as SBC) plan to install electric and fiber optic cables under Emerald Bay and to connect them to existing overhead facilities located on either shore of the bay. 2006042080	Elder Creek Business Park (P05-011) Sacramento, City of Sacramento--Sacramento The purpose of the proposed project is to obtain the necessary entitlements to subdivide one parcel totaling 10.08 +/- acres into ten industrial parcels, and create one remainder parcel (Lot A) south of the ten future parcels. The existing parcel has been developed with ten industrial buildings, built by right. The applicant is requesting to subdivide this parcel into one building per parcel. Upon approval of the tentative map, each industrial building and the remainder lot will be assigned a parcel number. There is no proposal plan for the remainder Lot A with this application, but it is predicted to be developed with similar light industrial uses as in the northern parcel.	NOD	
2006089001	Tentative Map TM05-13, Development Review Permit DR05-29; Application for Environmental Initial Study AEIS05-35 Santee, City of --San Diego A Tentative Map to create the East County Estates Subdivision, consisting of 17 residential lots on a 4.71 acre parcel of land, and a Development Review Permit for the construction of 14 new detached single-family dwelling units, and retention of 3 existing residences. The proposed development unit density is 3.6 dwelling units per gross acre, which is consistent with the underlying Low-Medium Density Residential R2 Zone that allows 2-5 dwelling units per gross acre. The new houses will range in size from 1,757 to 2,192 square feet, and will have two- or three-car garages depending on one- or two-story designs. The 3 existing residences will remain at their existing locations on Rhone Road. Three of the lots will take access off of Slope Street, while 11 of the 17 lots in the center of the site will take access from a new cul-de-sac street off of Rhone Road.	NOD	
2006088001	Willows Day Use Area, Silverwood Lake SRA (05/06-IE-24) Parks and Recreation, Department of --San Bernardino Restoration of the Willows Day Use Area to pre-disaster (Old Fire and Christmas Day Flood, 2003) conditions. Work involves removal of flood debris, restoration of picnic facilities and trails, and replacement of water lines and culverts.	NOE	
2006088002	Sequoia Union High School District Bus Parking Relocation Project Sequoia Union High School District Redwood City--San Mateo The Sequoia Union High School District proposes to move the existing bus parking facility at Sequoia Union High School to a location east of Hwy. 101 at 650 Bair Island Road to reduce congestion and improve safety at the existing school parking lot.	NOE	
2006088003	Corte Madera Creek Flood Protection and Environmental Enhancement California State Coastal Conservancy San Anselmo--Marin Conduct hydraulic and fish passage studies and analysis needed by the County of Marin to complete the County's flood protection and environmental enhancement plan for the Corte Madera watershed in Ross Valley, Marin County. Reduce flood threats while planning for fish barrier modification for portions of Corte Madera Creek.	NOE

2005122030	High Density Residential General Plan Amendment and Rezone EIR Elk Grove, City of Elk Grove--Sacramento The project has two main components: a General Plan Amendment and Rezone. The proposed project analyzes 13 sites (A, B, C, D, E, F, G, H, I, J, K, and M) for a General Plan Amendment from various land use designations to the High Density Residential designation. This project also includes a General Plan Land Use Element text amendment to (1) require 5.5% of the overall acreage (200 acres x 5.5% = 11 acres) within the South Pointe Policy Area to be designated for high density residential uses and (2) to require that 15 acres of Site F be designated for High Density Residential uses. The project would also rezone sites A, C, D, E, G, H, I, K, L, and M to the RD-20 (residential, 20 units per acre) zoning designation. Sites B and J would be rezoned to RD-30 (residential, 30 units per acre). Site F would not be rezoned as part of this project. Additionally, an amendment to the East Elk Grove Specific Plan (EEGSP) would be required for Site M to allow high density residential uses within the EEGSP and to indicate that 15 acres of Site M would be changed to the High Density Residential land use designation.	EIR	09/15/2006
2006081007	Southview San Diego, City of --San Diego Tentative Map/Rezone/Site Development Permit (TM/RZ/SDP) to allow for 21.1 acres of a 42.6-acre site to be subdivided into three legal lots (Lot 1, 4.9 acres; Lot 2, 7,208 acres; and Lot 3, 6,040 acres) to support future multi-family residential development. The remaining 21.5 acres are not a part of the current project. The project site is currently zoned AR-1-1. The applicant is proposing to rezone the site to RM-2-6, which allows 29 dwelling units per acre. The project also includes proposed to construct full-width improvements of Caliente Avenue along it's frontage south of Airway Road which consists of a 5-lane major road (3 lanes northbound and 2 lanes southbound); north of Airway Road, the project would be required to construct a 4 lane collector road to Otay Mesa Road (2 lanes north and south); and full build-out intersection improvements at Airway Road and Caliente Avenue to the easterly project boundary. The project also includes the construction of two storm water conveyance systems which would drain into two new detention basins in the easterly portion of the project site.	MND	08/31/2006
2006081008	Pizano / Horn Monterey County Planning & Building Inspection Salinas--Monterey Standard Subdivision of two (2) adjacent parcels of 62 acres & 89 acres, respectively, into 10 lots ranging in size from 5.4 acres to 40.3 acres.	MND	08/31/2006

2006081010	1707 Cloverfield Boulevard Self Storage Project Santa Monica, City of Santa Monica--Los Angeles The project involves a change of use for the property at 1707 Cloverfield Boulevard from light manufacturing occupancy to self-storage, both of which are allowed under the existing LMSD zoning. The project would involve demolition of a portion of the existing structure, and construction of new facade and interior second level storage space, 31 parking spaces, landscaping and fencing.	MND	08/31/2006
1991081025	The Lot Motion Picture Studios, Comprehensive Development Plan West Hollywood, City of West Hollywood--Los Angeles The overall square footage of development on the lot with the proposed project would decrease from a total of 684,910 square feet to 669,149 square feet, resulting in a total reduction of 15,761 square feet. It is anticipated that the lot will contain ten sound stages totaling approximately 148,539 square feet, 323,564 square feet of support office space, 168,161 square feet of media/workshop space, and 23,585 square feet of storage space.	NOP	08/31/2006
2006082005	Household Hazardous Waste Facility San Jose, City of San Jose--Santa Clara Relocation of an existing household hazardous waste drop-off facility currently located at the City of San Jose's Central Service Yard (1661 Senter Rd.). Proposed on-site activities consist of collection of household hazardous wastes such as paint, solvents, and motor oil from members of the public approximately four days per month, and temporary storage of the collected materials in prefabricated storage containers. Proposed site changes include new and relocated storage containers and creation of a driveway.	Neg	08/31/2006
2006082006	Gridley Wastewater Treatment Plant Expansion Project Gridley, City of Gridley--Butte The proposed project will address future capacity needs at the existing wastewater treatment plant over the next 20 years. The proposed project will result in an increase in the design capacity from a maximum dry weather flow of 1.05 million gallons per day (mgd) to 1.7 mgd. The increase in primary and secondary treatment capacity will be achieved by significantly increasing aeration in the aeration and polishing ponds (ponds #1 and #2 respectively), improving mixing in the aeration pond and replacing the existing headworks with a new facility. Hydraulic upgrades consisting of yard piping and inlet/outlet modifications will be performed to maintain the required minimum 2 feet of freeboard in all ponds at peak flows. The proposed modifications to the existing aeration systems will increase the wastewater treatment plant capacity and will reduce total suspended solids (TSS) and biochemical oxygen demand (BOD) concentrations in the effluent produced.	Neg	08/31/2006
2006082007	Lakewood Homes Major Subdivision Mendocino County Ukiah--Mendocino Major Subdivision with Vesting Tentative Map to create 62 lots of 3,580 to 15,310 square feet in 2 phases for the development of a self-help housing project: Variance to allow for 6 ft. fences on the property lines of 9 lots with backyards adjacent to the proposed sidewalks. 2006062027	McLaughlin Lot Line Adjustment and Special Permit for Secondary Dwelling Unit Humboldt County Community Development Services --Humboldt Four parcels currently exist, one of which was created illegally. This project seeks to adjust the illegal parcel to one of the legal ones thereby correcting the subdivision violation. The parcels range in size from 0.9-19.4 acres. The resultant three parcels will range in size from 8.1-8.6 acres. Proposed Parcel A, at 8.1 acres, will now be developed with a primary unit and an SDU. Proposed Parcel C, at 8.6 acres, will retain the existing residence and proposed Parcel B will remain vacant. The SP is to allow the existing "cabin" on -18 to become a SDU so that resultant Parcel A will have two residences. All development is served by on-site sewage disposal and community water. Because the LLA will not result in additional parcels, but an increase in the owner's potential ability to subdivide in the future. Staff finds the project subject to CEQA.	NOD	
2006089002	Tonde Razooly Humboldt County Community Development Services --Humboldt A Parcel Map Subdivision of approximately 288 acres into Parcel 1 and a designated remainder of approximately 6.8 and 281.26 acres, respectively. The subdivision sites a single family residence, detached garage, cabin, shop, and shed onto Parcel 1 and a mobilehome and detached garage onto Parcel 2. Both parcels are served by on-site sewage disposal and well water systems, and accessed via Alderpoint Road. The subdivision was previously approved under Project File PMS-16-94, the conditions of project approval met, but the parcel map was not recorded prior to project expiration. However, the associated Zone Reclassification (ZR-17-94), effective April 9, 1996, rezoned the lands into Agricultural General with Density Consistent Parcel Size combining zones of AG-B-7(6.8) and AG-B-7(46). There are no changes to the original approved project, and the current subdivision reflects the current zone boundary. The MND adopted under PMS-16-94 is proposed for re-adoption with the approval of the current project.	NOD

	uses/equestrian facilities, including an equestrian ranch; an on-site wastewater reclamation facility or alternative sewage transport to an existing treatment facility; and both on- and off-site circulation improvements.		
2004082078	Hudson Vineyards #99376-ECPA ('Carneros' Ranch) and #03376-ECPA ('Moorehouse' Ranch) Napa County --Napa The proposed project, Hudson Carneros Ranch #99376 -- ECPA and Hudson Moorehouse #03376 -- ECPA, involves earthmoving and grading activities on slopes greater than 5 percent associated with approximately 102.5 acres of new vineyard development on the 2 properties.	EIR	09/18/2006
2005012018	Northeast Water Storage Reservoir Replacement Roseville, City of Rocklin--Placer The proposed project would replace the existing 6 million gallon potable water storage reservoir with a new 7.25 million gallon reservoir. The existing 6 million gallon tank will be demolished and removed as part of the project.	EIR	09/18/2006
2006012101	Indian Creek Rehabilitation Project Trinity County Planning Department --Trinity The Trinity River ROD channel rehabilitation component focuses attention on the need to physically manipulate the bank and floodplain features of the Trinity River between River Mile 112.0 (Lewiston Dam) and River Mile 72.4 (North Fork Trinity River). The channel reconstruction is intended to restore the Trinity River's historical and alternate point bar morphology and habitat complexity to improve fishery resources. The Indian Creek Rehabilitation project: Trinity River Mile 93.7 to 96.5 is the third channel rehabilitation project already built or in the planning stages that will work together to enhance river processes and to increase fisheries habitat downstream of Lewiston Dam. This project has no specific flood control objectives. The project purpose and need is to provide increased juvenile salmonid rearing habitat on the mainstream Trinity River, and to reduce flow impacts to homes and other human improvements located adjacent to the Trinity River, from implementation of ROD flows.	EIR	09/18/2006
2006062071	Feather River Levee Repair Project Three Rivers Levee Improvement Authority Marysville, Yuba City--Yuba TRLIA is proposing the Feather River Levee Repair Project, an element of the Yuba-Feather Supplemental Flood Control Project, to increase flood protection in the Reclamation District (RD) 784 area of Yuba County. RD 784 is bounded by the Yuba River on the north, the Feather River on the west, the Bear River on the south, and the Western Pacific Interceptor Canal on the east. The project would address identified deficiencies in the Feather River levee, and would make related improvements to the Yuba River levee near its confluence with the Feather River. It would entail strengthening the existing Feather River left (east) bank levee from Project Levee Mile (PLM) 13.3 to PLM 17.1 and from PLM 23.6 to PLM 26.1, and strengthening the existing Yuba River left (south) bank levee from the confluence with the Feather River (PLM 0.0) upstream to PLM 0.3. The segment of the Feather River left bank levee between PLM 17.1 and PLM 23.6 would be either strengthened in its current location or set back following one of two possible alignment scenarios. A portion of the parcel is located within the State Responsibility Area (SRA) for fire protection; all future development (other than the residence currently under construction) will be located outside the SRA. The parcels will be accessed via a private paved road extension of Leeann Drive within a 40' wide r/w. No road exceptions are proposed. A Special Permit is required for tree removal in a residential zone. The future parcels will be served by community water and sewer. The mid-point density for this 3.3 acre site is +/- 11 units. This project proposed fewer units due to topographic and slope constraints. A strict adherence to the County's Greenway/Open Space (GO) combining zone has been included in the design of the subdivision in order to best protect the natural resources of the gulch areas. A residence is currently under construction on proposed Lot 6 using the Greenway and Open Space existing parcel development exception found in §3134-22.2.2.1 of the Humboldt County Code.	NOD

2006088027	<p>New York Creek Bridge Trail Project 1600-2006-0220-R2 Fish & Game #2 --El Dorado</p> <p>The project includes the construction of a 60-foot long 6-foot wide bridge made with pressure treated fir and supported by wood trestles and puncheons. The project also includes the 5 ephemeral stream crossings using a wet ford flat rock style crossing.</p>	NOE	
2006088028	<p>Auxiliary Gym Construction/Pool Building Reconstruction Capistrano Unified School District San Clemente--Orange</p> <p>Construction of a 14,203 square foot auxiliary gymnasium and the reconstruction of an existing pool building.</p>	NOE	
2006088029	<p>Jamison Mine Road Entrance Gate Parks and Recreation, Department of --Plumas</p> <p>Install a gate at the entrance of Jamison Mine Road leading to the Jamison Mine Complex Area at Plumas Eureka State Park to curtail vehicle access during the off season. Currently vehicles are traveling on rain saturated road surface before snowfall causing resource damage to the roadbed. Gate will be opened after snow melt when the road has dried out for vehicle traffic use. Two three foot deep post holes will be dug for gate installation. Gateposts will be anchored with concrete. Work will be completed by park staff using an excavator and hand tools. All equipment will be staged on the existing Jamison Mine Road. No vegetation will be disturbed.</p> <p>If evidence of potentially significant historical/archaeological resources are found (shell, burned animal bone or rock, concentration of bottle glass or ceramics, etc.), the District or Service Center archaeologist will be contacted and work will be suspended until identification and proper treatment are determined and implemented.</p>	NOE	
2006088030	<p>California Aqueduct, Lower Quail Canal Seepage Control Blanket Water Resources, Department of, Division of Engineering Gorman--Los Angeles</p> <p>The California Aqueduct in this reach known as the Lower Quail Canal has had a history of problems with canal foundation instability and seepage. Other reaches of this embankment both upstream and downstream of this site were previously repaired by the installation of designed drainage facilities (seepage blankets). The target section of the embankment to be repaired by this project is approximately 500 feet in length between aqueduct stations 310 to 316. The embankment slope will be cleared of existing weedy vegetation and regraded, and then a gravel berm with drainage pipes will be installed and covered with soil. Native soil previously excavated during canal construction will be excavated on-site for topsoil fill material. All areas of disturbed soil will be reseeded with an appropriate mixture of native plants for erosion control. The total project area will not exceed 3 acres of disturbed soil surface, including both the embankment repair area and the adjacent borrow area. This project will have no adverse environmental impacts, and the beneficiaries will be the State of California and all State Water Project users. Stabilization of the seepage site is considered critical to avoiding a potential future catastrophic failure of the aqueduct liner in this section such as occurred in 1984.</p>	NOE

2006088042	<p>Cal Pals Training Area Parks and Recreation, Department of Gorman--Los Angeles</p> <p>The purpose of this project is to install an OHV training area to be used by the California Police Athletic League (Cal Pals) at the Hungry Valley District. This training area will be installed adjacent to the existing Cal Pals dormitory.</p> <p>This training area will consist of a 150' by 200' area which will be cleared of brush and mowed. A shade Ramada will be installed with a picnic table adjacent to this area. The perimeter of this area will be fenced with a post and rail type fence.</p> <p>The required excavation for this project will include four 10" diameter, 36" deep holes for the supports of the shade Ramada. Also approximately 40-6" diameter, 24" deep post holes for the fence. No other excavation will be required.</p> <p>The entire project site was repeatedly disturbed during the 1970s when this area was an agricultural field. Much of the area to be disturbed currently contains exotic annual grass and mustards. However, there are some native plants that will be affected by this project. They include Rabbit Brush (<i>Chrysothamnus</i> sp.), Buckwheat (<i>Eriogonum fesciculatum</i>), Golden-bush (<i>Ericameria</i> sp.), Great Basin Sagebrush (<i>Artemisia tridentata</i>). All feasible efforts will be made to minimize the damage to the native plan community.</p> <p>There are no threatened or endangered species at the project location. The soil in this area is a sandy loam of the Gorman Series. There will be no change in drainage patterns or sediment loss resulting from this project.</p>	NOE	
2006088043	<p>Fir Cove/Bailey Canyon Water Treatment Plant Health Services, Department of --Trinity</p> <p>To provide water filtration to an existing surface water intake at Ruth Lake to augment insufficient water capacity from an existing well. The treatment water source will serve an existing United States Forrest Service (USFS) campground.</p>	NOE	
2006088044	<p>Call Mountain Lookout - Demolition Forestry and Fire Protection, Department of --Monterey</p> <p>CDF intends to demolish the dilapidated Call Mountain Lookout tower because in it current condition the facility is a hazard, is in poor repair and constitutes an inviting nuisance to members of the public. Demolition will occur as soon as funding is available and when practical; April through October for accessibility as roads are native surfaced. CDF personnel, inmate crews and/or contractors will conduct the demolition. The project will be confined to the curtilage of the lookout tower, all on State-owned land. Materials and equipment will be staged on the short spur road off the main access road and in the immediate area of the tower itself - no undisturbed land will be disturbed as a result of the project implementation. The site is not readily accessible to the public; it is 5 miles off of a paved road and behind locked gates.</p>	NOE

2006088045	<p>Defensible Space Chipper Program Forestry and Fire Protection, Department of Oroville, Paradise--Butte</p> <p>The Butte County Chipper Program will aid in protecting homes, communities and watersheds by reducing fuels in the wildland urban interface (WUI). Fuel reduction in the WUI will protect the environment from fires originating in or around homes from spreading to watersheds, as well as protect homes and communities from encroaching fire. Moreover, the program will provide residents and community fire safe councils the means to safely dispose of the hazardous fuels through chipping rather than burning; a practice which often leads to escaped fires.</p> <p>The Butte County Chipper Program, funded by a CDF Proposition 40 grant, will provide only for the chipping of hazardous fuels that have been cleared by residents, and community fire safe councils on an estimated 399 acres within the wildland urban interface of Butte County. All material will be cut by residents and community fire safe councils and yarded to the edge of roadways and driveways where it will be chipped. No mechanical equipment, including the chipper and transport vehicles will be used off road. The chipper will be restricted to existing roadways and driveways.</p>	NOE	
2006088046	<p>Class I * Permit Modification to Allow Larger Sizes of Railcars to Transfer Used Oil Toxic Substances Control, Department of Riverbank--Stanislaus</p> <p>The project is to approve a Class 1* permit modification to allow Riverbank to utilize railcars up to, but not exceeding a capacity of 30,000 gallons. Riverbank Oil Transfer, LLC (Riverbank) was issued a Standardized Hazardous Waste Facility Permit, Series C on March 31, 2001. The permit allows Riverbank to transfer/pump used oil from trucks operated by registered transporters to rail cars with a capacity of 24,000 gallons. The used oil then is transported to off-site storage, recycling and/or disposal facilities. Riverbank has requested a permit modification to use railcars up to 30,000 gallons, without changing the operating capacity or throughput of the transfer facility, and still remaining a Series C facility. This modification provides the facility with greater flexibility in choosing available railcars, and provides an improved economy of scale by shipping larger quantities, reducing transportation costs.</p> <p>Riverbank Oil Transfer is located within the Riverbank Army Ammunition Plant industrial facility, which is on the Hazardous Waste and Substances Sites List. The historical contamination which has caused Riverbank Army Ammunition Plant to be included in the Cortese List is unrelated to the Riverbank Oil Transfer facility and its operations.</p>	NOE	
2006088047	<p>Rio School District (District), Riverpark-Legacy Development Removal Action Workplan (RAW) Toxic Substances Control, Department of Oxnard--Ventura</p> <p>The RAW specifies mitigation procedures to be implemented at the proposed Riverpark-Legacy Intermediate School for the installation of a methane mitigation system for soils impacted with elevated levels of methane. Installation will occur in conjunction with school construction activities.</p> <p>By utilizing the natural tendency for methane to migrate to the surface, the system</p>	NOE

	would effectively capture the methane and direct it away from structures where it could accumulate. The system would therefore meet the Removal Action Objective of prevention of methane accumulation in the structures. The selected methane control measures include a sub floor membrane barrier (application of Liquid Boot), a passive venting system, and permanent sampling and detection probes above the membrane. An Operation and Maintenance (O&M) Agreement will ensure the school district will implement on-going operation, monitoring, data acquisition, reporting, and maintenance activities. The control measures, proposed under this alternative, are in accordance with DTSC's Advisory on Methane Assessment and Common Remedies at School Sites (June 2005) and meet or satisfy all applicable or relevant and appropriate requirements (ARARs) as identified in the RAW.		
2006088048	UPA Corrective Action Qualification Regulations Toxic Substances Control, Department of -- The proposed rulemaking establishes qualifications and a procedure for determining whether unified program agencies are qualified to implement corrective action at facilities under their jurisdiction. Section 25404.1 of Division 20 of the Health and Safety Code requires DTSC to adopt regulations specifying these procedures and criteria to provide UPAs authority for environmental assessment and corrective action at unified program facilities, as described in section 25187(l) of the Health and Safety Code. This rulemaking amends section 67450.7 and adds new sections 68400.11 to 68400.16 of Title 22, Division 4.5, California Code of Regulations.	NOE

2000071116	Goat Canyon Enhancement Project Parks and Recreation, Department of --San Diego The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0096-R5 pursuant to Section 1602 of the Fish and Game Code to the project applicant, California State Parks. The applicant proposes to alter the stream to perform periodic maintenance of the Goat Canyon Sedimentation Basins and associated wetland mitigation sites. The Goat Canyon Sedimentation Basins were constructed in 2003-2005 under Streambed Alteration Agreement #R5-2003-0100. The newly constructed basins need to be maintained at least annually to properly perform their function. Low impact maintenance such as manual trash collection, BMP maintenance, manual weed control, biological monitoring, and irrigation repair will occur throughout the year. To remove sediment from the basins, large dozers will push the sediment towards the edges of the basins, and excavators will load it into trucks to be hauled to the adjacent staging area/soil processing pad. Care will be taken to minimize the disturbance to vegetation on the upper parts of the interior basin slopes. Once on the processing pad, loaders will take the material to a soil processing machine that separates the tires, trash, and rocks from the soil. The processed soil will be stockpiled on the pad and removed as it is sold. Tires and trash will be hauled away by licensed waste haulers.	NOD

2006088051	Funsch Driveway Culvert Fish & Game #2 --Placer Agreement No. 2006-0063-R2. Install culvert driveway crossing.	NOE	
2006088052	Line 200 Pipeline Repair Fish & Game #3 Martinez--Contra Costa Repair of pipeline near Arroyo del Hambre. Issuance of a Streambed Alteration Agreement Number 1600-2006-0050-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2006088053	Fairfax Creek Bank Stabilization Project Fish & Game #3 Fairfax--Marin The project proposes to repair/restore the stream bank by constructing a vegetated, soil filled Green Terramesh wall structure, protected and supported by a vegetated rock rip-rap foundation. The Terramash wall will cover an area of approximately 36-feet long by 10-feet high at a 1:1 ratio foot slope; the foundation structure of the vegetated rip-rap will cover an area of approximately 36-feet long by 4-feet high with a 4-foot width and 1:1.5 slope. The structure will be tied to the existing stream banks with native fill. Native species of plants will be utilized to restore under story canopy while willow species will be utilized among the Terramesh areas; the site will be irrigated until planted vegetation has established. Issuance of a Streambed Alteration Agreement Number 1600-2006-0479-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2006088054	San Vicente Pond Channel Excavation Fish & Game #3 --Santa Cruz This project, located approximately 2,000-feet southwest of the town of Davenport, Santa Cruz County, entails to excavate within the inlet channel of the Coast Dairies & Lands Company's San Vicente Creek off-channel pond. The pond was formerly used for agricultural purposes. The pond receives freshwater from San Vicente Creek via the pond channel, which had been excavated across natural substrate. Due to high flows of April 2006 and related bank and tree failures, the creek has downcut approximately two feet at the inlet confluence, leaving it perched. The loss of freshwater inflow has resulted in a severe deterioration in water quality and a dropping of water surface elevation in the pond. The elevation of the pond is also below the elevation of the pond outlet. Issuance of a Streambed Alteration Agreement Number 1600-2006-0461-3 is pursuant to Fish	NOE

	and Game Code Section 1602.		
2006088055	Larsen Creek Bridge Replacement Project Fish & Game #3 --Marin The project proposes to replace two bridges spanning Larsen Creek. The upstream bridge (closest to the clubhouse) is currently 34-feet long and 10-feet wide. This bridge is located in an open field and is easily accessible for construction. The creek banks are sloped and grassy. The existing bridge deck is approximately 11-feet above the thalweg. The downstream bridge is currently 40-feet long and 10-feet wide. The bridge site is in a riparian forest. Work will be accomplished from top of bank and not within the stream channel. Work involved includes the following: minor grading to place the bridge at grade (both bridges), and tree pruning and possibly removal of one tree may be required (downstream bridge). The applicant proposes to replace disturbed vegetation with native species. The new wooden bridges will be set on wood piers no closer than 10-feet from the top of the stream bank. No piers will be set in the creek. Abutments/piers will be 10-feet wide and lengths will be similar to existing. The bridges will be installed by crane, requiring no equipment in the creek. Issuance of a Streambed Alteration Agreement Number 1600-2006-0463-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2006088056	Culvert Replacement (PM 4.22) and Sediment Removal from Trinity House Gulch (PM 4.66) on Brown's Mountain Road, County Road #222 Trinity County Planning Department --Trinity Brown's Mountain Road is predominantly a single lane, native/rock surface road that runs approximately 11 miles from Highway 299 to Old Lewiston Road. The road bisects three tributary watersheds to the Trinity River, Little Browns Creek, Trinity House Gulch and Lime Kiln Gulch. Approximately 90% of the road system crosses Sierra Pacific Industries and Bureau of Land Management lands. The project consists of: (1) upgrading a Class II stream crossing at post mile 4.22 and (2) removing approximately 100 cubic yards of sediment fan currently positioned just above the inlet of a Class I crossing at Trinity House Gulch, post mile 4.66. This work will be performed within the county road right-of-way or jurisdiction.	NOE	
2006088057	Honey Lake Wildlife Area Wetland Restoration Project - Dakin Unit (Fields 2E and 15C) and Fleming Unit (Fields 14B, 23, and 29A) Fish & Game #1 --Lassen This project will improve a total of about 404 acres of habitat. It will restore a total of 283 acres of seasonal wetlands and 121 acres of agricultural lands managed to produce food and cover for wildlife. The work to restore seasonal wetland habitat will be conducted in Fields 14B and 29A at Fleming Unit and Fields 2E and 15C at Dakin Unit, and includes recontouring the land within these 4 managed seasonal wetland units, rebuilding/reconstructing existing levees, removing an existing levee (Dakin Field 15C), constructing new levees, replacing existing and installing new water control structures, and reconstructing nesting islands. To enhance agricultural lands managed to produce wildlife food and cover, a 1,320 foot long section of water conveyance pipeline will be installed at the Fleming Unit in Field 23.	NOE

2006088058	Veteran's Memorial Park Stanton, City of Stanton--Orange The development of a vacant parcel as a veteran's memorial park to include five 5-side monoliths on a 6,885 square foot property located at Katella Avenue within the C-1 (Neighborhood Commercial) zone.	NOE	
2006088059	Maintenance Dredging of the Strawberry Navigational Channels Regional Water Quality Control Board, Region 2 (San Francisco Bay), Oakland Larkspur--Marin Maintenance dredging of 12,000 cubic yards of additional sediment that has deposited in the Strawberry Navigational Channel and residential docks since the previous certification was issued on October 24, 2004. The previous certification expired on December 31, 2005. Disposal of the dredged sediments will occur at the Alcatraz Dredged Material Disposal Site (SF-11) in San Francisco Bay.	NOE	
2006088060	Campus Infrastructure Improvements California State University, Channel Islands --Ventura The proposed project would involve the replacement, updating, and extending the distribution of ten campus infrastructure systems. In support of these systems, a hot water/chiller plant would be developed. The project would assure infrastructure capacity and capability build-out.	NOE	
2006088061	Arden Park Construction Project Arden Manor Recreation and Park District Sacramento--Sacramento Project will consist of replacement of existing concrete sidewalk, roadway widening landscape improvements, picnic areas, turf replacement and irrigation. The park improvements renovation work will enhance the safety and enjoyment of the park facility for community use.	NOE	
2006088062	Oakzanita Trail Routine Maintenance (06/07-CD-3) Parks and Recreation, Department of --San Diego This project is the ongoing maintenance of the existing Oakzanita Trail. The maintenance area includes the 4-foot-wide trail tread, plus up to 2 feet on each side of the trail tread. Maintenance activities include trail contouring and smoothing, structure repairs, and trimming of vegetation (including selective application of appropriate herbicides in areas without sensitive vegetation). All work will be done using hand tools or a small motorized trails machine. One sensitive archaeological site is present adjacent to the trail, and during trail maintenance only hand tools will be used in this area, plus a State Parks authorized archaeological monitor will be present. This project includes all required trail maintenance activities, as described above, needed from the present through December 2010.	NOE

2006031127	South River Trail and North Valencia Trail Repairs Santa Clarita, City of Santa Clarita--Los Angeles The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0565-R5 pursuant to Section 1602 of the Fish and Game Code to the project applicant, City of Santa Clarita. The City will alter the streambed and bank by repairing and reconstructing a damaged public trail. The project consists of removing portions of the asphalt trail that collapsed into the streambed, excavating a key below the existing riverbed elevation; installing rock riprap within the key and placing new alluvial fill within the footprint to reconstruct the slope. Final work will include installing rock rip rap along the new slope and paving the new trail surface. The impact area is 70 feet wide and 360 feet long for a total of 0.58 acres.	NOD	
2006031127	South River Trail and North Valencia Trail Repairs Santa Clarita, City of Santa Clarita--Los Angeles The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0754-R5 pursuant to Section 1602 of the Fish and Game Code to the project applicant, City of Santa Clarita. The City will alter the streambed and bank by repairing and reconstructing a damaged public trail. The project consists of removing portions of the asphalt trail that collapsed into the streambed, excavating a key below the existing riverbed elevation; installing rock riprap within the key and placing new alluvial fill within the footprint to reconstruct the slope. Final work will include installing rock rip rap along the new slope and paving the new trail surface.	NOD	
2006051127	Picachio Road Bridge at Cayucos Creek Replacement Project San Luis Obispo County --San Luis Obispo A proposal by San Luis Obispo to replace the existing two-span, timber Picachio Road Bridge over Cayucos Creek with a single span, cast-in-place, voided slab bridge. The existing bridge, construct in 1940, is functionally obsolete. Major components of the project include removing and replacing the existing bridge, constructing and removing a temporary 23-ft-wide gravel-surfaced traffic detour, creek bank stabilization, and restoring creek banks disturbed during construction to preconstruction condition. The bridge footprint would be increased from approximately 756 square feet to approximately 1,705 square feet. The existing supporting structures within the creek would be removed, and foundations for the new bridge would be placed behind the top of the creek banks. The total area of disturbance is estimated to be 1.07 acres.	NOD	
2006061119	Well 5719-1 Coachella Valley Water District Indio--Riverside The Well 5719-1 project includes drilling, casing, testing, and developing a 1,800 gallon-per-minute (gpm) domestic water well including the installation of a	NOD

	300-horsepower motor, a pump, and other aboveground and underground appurtenances required to connect the well and pumping plant to the domestic water distribution system. A 12-inch PVC pipeline will be installed underneath Avenue 40 to carry well development water to an empty, undeveloped, adjacent lot during project construction. The Well 5719-1 site is surrounded by an existing six-foot-high masonry wall. The purpose of the Well 5719-1 project is to provide additional domestic water service and fire flow to the Sun City Pressure Zone.		
2006062142	Little River Fern Canyon Trail and Campground Improvements Project at Van Damme State Park Parks and Recreation, Department of --Mendocino Move four campsites from streamside location to Upper Meadow Campground; replace footbridge between Group Camp and the lower shower building and realign trail to combination building away from streambank; scarify group parking area and install permeable surface; construct cooking shelter (ramada) and fish cleaning station in the Group Camp; install propane tank and a connection to the sewer line adjacent to the ramada; repair and realign Fern Canyon Trail from the upper loop trail from the Pygmy Forest boardwalk down approximately 2.5 miles down Fern Canyon; replace five trail footbridges, moving one approximately 200 feet upstream; construct a new bridge over the last remaining intact low water ford; turnpike old skid road in Pygmy Forest; construct two sets of crib stairs on Fern Canyon Trail; add two small retaining walls in the canyon and numerous drainage dips.	NOD	
2006088076	Mosier Rock Quarry: Removal of Boulders in Matilija Creek Fish & Game #5 Ojai--Ventura The Operator intends to alter the streambed by removing rocks and boulders which fell into the creek in a land slide in February 2006. The rock and boulders will be removed with a crane, from the top on the bank, along Highway. The boulders which are too large to remove in one piece, will be blown up with the use of explosives, then the pieces will be removed. The major portion of the rock is located on the upstream portion of the quarry, with a few individual rocks downstream. The rock is blocking steelhead migration, and causing the water to under cut the Highway. Steelhead are present in a pool immediately upstream of the rocks, and throughout the site. DFG biologist Mary Larson will be involved with the relocation of fish just prior to the rock removal and blasting. The area consists of willow riparian, with alders and bay trees. All of the work shall be done from the top of the bank, with some minor pruning of vegetation. The creek flows in between the quarry and the Highway.	NOE

2006082043	Village at Novato Phase I Drainage Improvement Novato, City of Novato--Marin The proposed project consists of the piping and filling of approximately 300-linear feet of an existing 566-linear foot man-made drainage channel along the common property boundary between 7514 and 7530 Redwood Boulevard. The proposed project is necessary to allow the widening of an existing service driveway to meet the access requirements of the Novato Fire Protection District. The service driveway is located on the north side of the existing commercial building at 7514 Redwood Boulevard.	Neg	09/08/2006
2006032120	Moffett Towers Sunnyvale, City of Sunnyvale--Santa Clara The project proposes the construction of seven eight-story office buildings, three four-level parking structures, surface parking areas, and a two-story amenities building that would house food service, meeting rooms, and recreational uses. The project requires a General Plan Amendment for a portion of the site to change the Moffett Park Specific Plan subdistrict and Zoning from MP-I (General Industrial) to MP-TOD (Moffett Park Transit Oriented Development). The Project proposes to increase the maximum allowable floor area ratio to 70% FAR from the standard intensity of 50% FAR.	SIR	09/25/2006
2004102005	RMC Pacific Materials Project Final EIR West Sacramento, City of West Sacramento--Yolo The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0211-R2 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Port of Sacramento. Dredging is required to relocate a cement terminal to a parcel adjacent to the Port of Sacramento as part of the City of West Sacramento's Redevelopment Plan. The project involves dredging the bank and bottom of the Sacramento River Deep Water Shipping Channel (a commerce waterway excavated from uplands) to allow room for ship docking and construction of dock. Dredged material will include sediments and soil from the Channel and will total approximately 97,000 cubic yards. The dredge tailings will be placed across the channel from the Study Area at the Port's "S-1" upland disposal site. Rip-rap will be placed along 800' of the dredged shoreline to control erosion from 0' to the top of the bank. Concrete and steel pilings totaling about 4,860 sq. ft. will be permanently placed along the Channel bank to support a dock and access bridge. The current shoreline in the project area is a rip-rap slope with no wetland or riparian vegetation. Previous site use of the project area was a wood chip manufacturing facility and much of the surrounding area harbors industrial facilities. Cement storage, mixing, and distribution facilities will be built in the upland portion of the site after the	NOD

2006088087	"The Park" Facility Improvements La Habra Heights, City of La Habra Heights--Los Angeles Maintenance improvements to an existing public park which includes a bike rack, horse trough, fencing, irrigation, painting, and picnic benches. Construction of an approximately 700 sq. ft. booth for selling food and provide public announcements.	NOE	
2006088089	Lincoln Fire Station No. 1 - Soil Remediation Lincoln, City of Lincoln--Placer The purpose of the project is to remove contaminated soils in conjunction with the construction of Lincoln Fire Station No. 1 (Phase II). Phase II includes the continued excavation of contaminated soil. A work plan was previously approved by the California Regional Water Quality Control Board which included the removal of approximately 6,000 cubic yards of soil (Phase I); installation of three PVC conductor casings, the cavity was lined with filter fabric, backfilled with pea gravel, and covered with soil and compacted.	NOE	
2006088090	Resolution No. 2006-20: A Resolution of the Los Osos Community Services District Rescinding the Statement of Overriding Considerations for the Los Osos Wastewater Los Osos Community Services District --San Luis Obispo The Community Services District has rescinded the Statement of Overriding Concerns (SOC) included in the Final EIR for its wastewater treatment project. The SOC was based on information that was outdated, erroneous, or both. Consequently, the Final EIR's conclusion that construction of a wastewater treatment plant at the Tri-W site is supported by the SOC is incorrect. Resolution 2006-20 rescinded the SOC, while leaving in place the environmental findings made by the FEIR. This action benefits the residents of Los Osos and Baywood Park, and more specifically the residents of the "prohibition zone" within those communities.	NOE	
2006088091	Alamo Check Drainage Project Solano County Water Agency Vacaville--Solano The project proposes a rehabilitation to eliminate the ponding and reinstate positive drainage flow away from the properties. A key component of this project is to install an 8-12 inch outfall with a flap gate to a drainage ditch, which empties to Alamo Creek, immediately to the North of the Putah South Canal. The proposed project is only intended to improve drainage issues from routine storm events and will have no adverse impact during larger storm events. The drainage flows from the property are estimated to be 0.3 and 0.4 cubic feet per second for a 10 year and 25 year event, respectively. The velocity through an 8" pipe for the higher flow is approximately 1 ft/sec. The pipe will discharge onto existing rock slope protection. The flap gate will only allow the pipe to discharge when there is capacity in the channel.	NOE	
2006088092	Lindsey Slough Monitoring Station Solano County Water Agency Rio Vista--Solano The Lindsey Slough Monitoring Station will be measuring flow and velocity, turbidity, conductivity, water temperature, and stage. The station is located	NOE

	approximately 250 ft. downstream of the Hastings Island Bridge. The monitoring station will also serve as the downstream boundary condition to a Hydrodynamic Model that the Solano County Water Agency (SCWA) is working on. Currently, SCWA is trying to better understand the flow dynamics in Barker Slough, Calhoun Cut, and Lindsey Slough so that water quality can be improved at the Barker Slough Pumping Plant. The Barker Slough Pumping Plant experiences some of the poorest water quality out of the entire State Water Project. Barker Slough has high levels of Organic Carbon, increasing the levels of Trihalomethanes (THMs) in treated source water, which are known to be carcinogenic. The Agency hopes to better understand how water moves through the various sloughs and upland tributaries, so that water quality can be improved for both Napa and Solano Counties.		
2006088093	Sacramento Bypass North Levee Landside Slipout Water Resources, Department of West Sacramento--Yolo This project repairs an approximately 180 foot wide area where the levee soil is sloughing. The levee slope will be reconstructed to existing conditions by reusing the existing material combined with a geosynthetic polymer grid to reinforce the soil. The design will key a four foot trench below grade at the toe to tie in new construction with the more competent foundation material.	NOE

2006082051	2006-74 GPA, ZA Blue Mountain Residential Center County Initiated General Plan and Concurrent Rezoning Amendment Calaveras County Planning Department --Calaveras This proposed amendment is to redesignate the current approximately 25 square mile Glencoe, Railroad Flat and West Point Residential Center Lands (Blue Mountain Residential Center) to a Residential Center 40 acre minimum parcel size designation. The existing Residential Center designation allows for a minimum density range from one-half acre lots to 40-acre lot minimum density. The amendment would remove the lower density ranges and require new subdivisions to have a 40 acre minimum lot size. The amendment would not affect the status of legally created lots of less than 40 acres; they will continue to be recognized. The general plan designation amendment will result in a reduction from a theoretical 30,000 plus residential units to an approximate 450-2,500 potential additional residential units in the Blue Mountain Residential Center.	Neg	09/11/2006
2006082054	Inclusionary Zoning Ordinance Pacifica, City of Pacifica--San Mateo The purpose of the Ordinance would be to provide a mechanism for the City to govern the composition of affordable versus market rate housing in applicable residential and mixed-use development projects. Specifically, the Ordinance would mandate that all development proposals including 8 or more residential units or parcels involving new construction of rental or for-sale housing units, subdivisions of property for single family or duplex housing development, or conversion of rental apartments to condominium or other common interest ownership, would be required to provide at least 15% of the units for below market rate (BMR) occupancy. Affordable units would consist of those units affordable to moderate and lower income households as defined in the Ordinance and formulas to address the rent structure and sale price of BMR units is included therein. Moreover, resale controls would be required in the form of deed restrictions and/or as part of the covenants, conditions and restrictions, where applicable, in order to guarantee the continued availability of affordable units to eligible households. The Ordinance would also provide a mechanism for off-site construction, land	Neg	09/11/2006

1995033027	Hercules Land Use and Circulation Elements Revision Hercules, City of HERCULES--CONTRA COSTA The project involves bridge construction with mitigation, flood control, and maintenance goals. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0650-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Phil Rodriguez / Lewis Operating Corporation.	NOD	
1998082073	Bickford Ranch Specific Plan Placer County Auburn--Placer The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0186-R2 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Suncal Companies, Inc. Installation of a sewer line under an existing culvert along Highway 193.	NOD	
1998102084	Specific Plan Amendment No. 3 to the Bridle Ridge Specific Plan (SP 98-01) Oakdale, City of Oakdale--Stanislaus For approval of a General Plan Amendment to incorporate the Specific Plan Amendments to the Bridle Ridge Specific Plan 02 and approval of Vesting Tentative Subdivision Map for the purposes of dividing 5.67 +/- acres (APN 063-026-003) and 8,953.44 square feet (APN 063-026-002) of land into 35 lots for single-family residences within a portion of the Bridle Ridge Specific Plan (BRSP) area. The project site is situated south of Greger Street, east of Crane Road and northwest of the Crane Lateral. Considerations of the General Plan Amendments include amending the land use plan from Single Family Low Density Residential (SFLDR) to Low Density Residential (LDR) for APN 063-026-002 and 003 included in Vesting Tentative Subdivision Map 2005-04 and to incorporate the Bridle Ridge Specific Plan amendments as requested.	NOD	
2002082057	West Roseville Specific Plan and Sphere of Influence Amendment Roseville, City of Roseville--Placer The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2006-0206-R2, pursuant to Section 1600 et al of the Fish and Game Code to the project applicant, PL Roseville, LLC. This project involves the filling of drainage swales and the installation of culverts and riprap. A total of 0.431 acres of DFG jurisdictional waters will be impacted.	NOD	
2002082057	West Roseville Specific Plan and Sphere of Influence Amendment Roseville, City of Roseville--Placer The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2006-0176-R2, pursuant to Section 1600 et al of the Fish and Game Code to the project applicant, West Roseville Development Company. Construction of drain outlets, bridges, culverts, a sewer siphon, and a utility crossing impacting 0.032 acre permanently and 0.362 acre temporarily within section 1600 jurisdiction.	NOD

2003031036	MarBorg C&D Recycling and Transfer Facility Santa Barbara County Santa Barbara--Santa Barbara The applicant requests a permit revision to increase daily tonnage, include the handling of electronic wastes, inert debris, and tires, and add holidays to the hours of operation. Environmental Health Services hereby adopts the Final Negative Declaration that was prepared for this project.	NOD	
2004052008	Marin Coastal Watersheds Permit Coordination Program Marin Resource Conservation District --Marin The proposed project involves the replacement of an existing pedestrian and horse bridge with a multipurpose bridge and planting of native species to control water runoff and sediment inputs within Devil's Gulch Creek, tributary to Lagunitas Creek, tributary to Tomales Bay, located within Samuel P. Taylor State Park, Lagunitas, in the County of Marin. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0425-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Nancy Scolari / Marin Resource Conservation District.	NOD	
2004052008	Marin Coastal Watersheds Permit Coordination Program Marin Resource Conservation District --Marin The proposed project involves addressing runoff from a corral with subdrains, vee-ditch, and sediment basins; armored outlet with rock-lined horse trail; addressing runoff with rock-lined road; and installing a gate and water trough. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0510-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Nancy Scolari / Marin Resource Conservation District.	NOD	
2004052008	Marin Coastal Watersheds Permit Coordination Program Marin Resource Conservation District --Marin The proposed project will install exclusionary fencing to keep livestock from sensitive areas, developing an alternative water source, installing a rock-lined waterway and culvert wet crossing, and repairing an existing access road. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0509-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Nancy Scolari / Marin Resource Conservation District.	NOD	
2004052008	Marin Coastal Watersheds Permit Coordination Program Marin Resource Conservation District --Marin The proposed project will stabilize and repair two actively eroding gullies to prevent further sediment delivery. Site 3 is a 180' by 30' gully repair with several headcuts, and Site 12 is approximately 225' to 10' gully with a headcut at the upstream end. Rock will be used to stabilize the headcuts, and lined waterways will stabilize the area below. Exclusionary fencing will be installed to keep livestock away from the gullies. The area will be revegetated with native plants. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0508-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Nancy Scolari / Marin Resource	NOD

	Conservation District.		
2004094008	Airport Surveillance Radar, Monterey Peninsula Airport Federal Aviation Administration Marina--Monterey The proposed project is an easement to allow the installation and maintenance of underground telephone lines on UC property to serve the Airport Surveillance Radar, Model 11 (ASR-11) facility to be constructed on land owned by the City of Marina. The proposed area needed for the telephone lines is 10 feet by 3,675 feet, along the western fence of the University property located at the Fort Ord Natural Reserve (FONR). The installation of the telephone line will require excavating of a trench approximately 18 inches wide and 3-4 feet deep.	NOD	
2005042018	Rivers Phase II West Sacramento, City of West Sacramento--Yolo The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0110-R2 pursuant to Section 1602 of the Fish and Game Code to the project applicant, West Riverview of West Sacramento. Bank stabilization of 3,000 LF of the west bank of the Sacramento River from RM 60.5 to RM 61.3 and construction of a decomposed granite trail.	NOD	
2005071083	Newland Street Residential Project Huntington Beach, City of Huntington Beach--Orange The Applicant, WL Direct Huntington Beach, LLC, proposes to amend the General Plan Land Use designation of a 23.097 acre parcel from I-F2-d (Industrial - 0.5 Floor Area Ratio - design overlay) to RM (Medium Density Residential); to amend the zoning map from IL-O-FP2 (Limited Industrial - Oil District overlay - Flood Plain 2) to RM-FP2 (Medium Density Residential - Flood Plain 2); and to develop and subdivide the former industrial site to a residential development with 204 multi-family residential units and approximate two acre public park. The proposed project site was formerly used as an oil pipeline and storage tank terminal, for which decommissioning and remediation has been completed. A portion of the site is currently operating as a recreational vehicle and boat storage facility, which would be removed and replaced with the proposed new uses.	NOD	
2005102075	Line M Channel Box Culvert Project Union City Union City, Fremont--Alameda The City of Union City proposes to convert 490 feet of a 700-linear-foot section of the existing concrete-lined creek into a box culvert. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2004-0904-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Carlos Jocson / City of Union City. 2006012055	Lincoln and Mission Residential Condominium Project San Rafael, City of San Rafael--Marin This project includes the demolition of a 24-unit multi-family residential complex and a single-family home, and the development of 36 condominium units, including six below-market-rate units, on two parcels within the City of San Rafael. As part of the development project, the applicant seeks an Environmental and Design Review Permit (ED04-102), Vesting Tentative Map (TS05-001), and a Use Permit (UP05-032).	NOD	
2006032084	Paulson Lane Subdivision/ Subdivision No. SD048939 Contra Costa County Walnut Creek--Contra Costa The project includes phased removal of existing structures and development of 22 homes located at Las Trampas Creek. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0495-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Bob Walsh / BNB Ventures.	NOD	
2006042035	Peterson Water Treatment Plant Hydraulic Improvements Project San Juan Water District Folsom--Placer, Sacramento The San Juan Water District Water Treatment Plant Hydraulic Improvements Project consists of construction of new raw- and treated-water pipelines, a settled water conveyance canal, and other improvements to the Sidney N. Peterson Water Treatment Plant to increase raw and treated water conveyance capacity. The proposed project would involve activities located exclusively within the Peterson WTP boundaries adjacent to existing facilities. Construction of the proposed project would include site grading, excavation, installation of water pipelines and valves, and a concrete conveyance canal.	NOD	
2006052041	Department of Fish & Game - Year 2006 - Fisheries Restoration Grant Program Project Fish and Game (HQ) Environmental Services Carpinteria-- The operator intends to alter the streambed to restore steelhead migration to the Carpinteria Creek watershed, by removing four fish barriers, all Arizona concrete crossings, and replacing them with 3 span bridges, on three properties. Bliss: The project consists of removing the existing crossing, replacing with a new span bridge with abutments outside the banks. The invert will be graded for 500 linear feet to prevent head cutting. One ungrouted rock check structure is required, using 3 to 4 ton imported boulders. Cate School: The existing crossing will be replaced with a new 70 foot span, with abutments outside the banks along the same alignment. Downstream of the crossing, an eroding bank will be repaired by sing biotechnical stabilization, consisting of ungrouted rock toe protection, with bio-D blocks above the rock. Raya: Two concrete crossings will be removed and replaced with one clear span bridge at the upstream crossing location.	NOD	
2006052048	Meshke Family Trust Zone Change / Tentative Parcel Map (Z-06-01/TPM-06-01) Siskiyou County Planning Department Tulelake--Siskiyou Siskiyou County requests an amendment to the conditions, notations, and findings for the Meshke Family Trust Tentative Parcel Map approved by the Planning Commission on July 12, 2006. 2006088127	Upper Halstead Meadow Pilot Restoration Project and Emergency Road Stabilization Regional Water Quality Control Board, Region 5 (Central Valley) --Tulare The proposed project is to stabilize the existing road prism at the main culvert outlets at the Halstead Meadow road crossing, and to restore the portion of Halstead Meadow up-gradient of State Highway 198. The road stabilization portion of the project will consist of diverting water around the project site, and placing 300 cubic yards of riprap on the south slope of the road and below the gully outlets, by using a large excavator to move riprap to desired locations. For the restoration portion of the project, water will be diverted around the project area before equipment enters the gully. Approximately 8,000 cubic yards of local fill will be placed and compacted within the 1,500-foot long erosion gully and side channels. Erosion control blankets will be placed over the compacted soil. A high fill retainer, approximately 5.7 feet high, will be constructed at the base of the filled gully, and a swale across the base of the entire meadow will be created to temporarily direct the water toward the culvert inlets. To prevent new channels from forming 10 to 20 trees will be placed across the meadow to act as dams. Approximately 53,000 native wetland plants of three species will be planted in the meadow.	NOE	
2006088128	Andrews Property Riparian Habitat Improvement Project II San Luis Obispo County San Luis Obispo--San Luis Obispo Bank stabilization and native plant establishment on San Luis Obispo Creek to provide pool habitat and shade for steelhead, a threatened species. Bioengineering techniques will be used.	NOE

Project is mixed use and contains 125 residential units and 40,035 s.f. of commercial. General Plan amendment is proposed to process special street sections for Ramon Road and Indian Canyon Drive to maintain existing street improvements.	EIR	09/28/2006
2006081086	Wasson Canyon Slope Stabilization Lake Elsinore, City of Lake Elsinore--Riverside Wasson Canyon Investments, LP, proposes to perform remedial grading to reconstruct and stabilize an existing manufactured slope that was constructed by the City of Lake Elsinore (or its contractors) in the early 1990s as part of a planned roadway project, which was never completed. The subject slope is set back from 20 residential lots (Nos. 49-68) within the approved residential development. The lower portion of the slope area to be graded and stabilized extends downward into Wasson Canyon beyond the curved southeastern property boundary of The Villages at Wasson Canyon development.	MND	09/13/2006
2006081087	Pedregal Palm Springs, City of Palm Springs--Riverside The applicant proposes a subdivision for condominium purposes and construction of 131 attached condominium units and one detached condominium unit on a 13.95 acre or 607,662 square foot site. The proposed condominium complex consists of one and two story buildings at 15 feet and 24 feet in height, respectively. The site plan proposes two pools, an exercise room, 259 parking spaces and surrounding landscaping.	MND	09/13/2006
2006081088	Aquarium of the Pacific Facility Enhancement Project (ND 14-06) Long Beach City Planning Commission Long Beach--Los Angeles The Aquarium of the Pacific proposes (1) to construct 5,300 square feet of indoor facilities and 13,800 square feet of outdoor, fabric-shaded exhibit area at the rear of its existing campus and (2) to relocate its current aviary exhibit to the same parcel. The Aquarium Enhancement Project involves an adjustment to the current leasehold boundaries and the potential conversion of a portion of Shoreline Park to non-outdoor recreation uses. The proposed leasehold adjustment will not change the total square footage of the Aquarium campus or Shoreline Park. No demolition is required. Construction of the program's four project components will be phased. Thresholds of Significance and mitigation measures were identified in Queensway Bay Master Plan EIR (SCH# 1994081033) certified 3/2/95.	MND	09/13/2006

2006081090	Williams TPM20875RPL2 San Diego County Department of Planning and Land Use --San Diego The immediate surrounding area has single family residences to the west and east and vacant land to the north and south. The areas to the north and east are also zoned (1) Residential; the areas to the west and south are zoned (18) Multiple Rural Use. There is a mix of lot sizes, ranging from a little over one acre to 92 acres. The terrain is largely in a rugged, natural state with steep slopes.	MND	09/14/2006
2006082081	Griffith Tentative Parcel Map P-06-34 Trinity County Planning Department --Trinity Rezone from Unclassified to Single Family Residential 10,000 sq. ft. min., and tentative parcel map to create two parcels from 0.52 acre.	MND	09/14/2006
2006081085	MS 1123-02 Grimsley San Benito County Hollister--San Benito To subdivide a 20.08 acre parcel into four or five acre parcels.	Neg	09/13/2006
2006081089	Longbow, LLC Ace Prospect Division of Oil, Gas, and Geothermal Resources Bakersfield--Kern Proposes activities necessary to drill and test up to 30 oil and gas wells on 3 sites and possibly construct and operate a production facility for a maximum possible disturbance of 1.6 acres.	Neg	09/13/2006
2006082079	2006-08 Zoning Amendment and Tentative Parcel Map for Bradley M. and Jeannene K. White Calaveras County Planning Department --Calaveras The applicants are requesting a Zoning Amendment from U (Unclassified) to RA (Residential Agriculture) for 10 +/- acres of land. Concurrently requested is approval to divide the site into two parcels of five acres each.	Neg	09/13/2006
2006082080	General Plan Amendment and Zone Change 2005-0005 Yuba County --Yuba A request to change the General Plan designation and zoning of the two parcels APN 014-190-045 and 014-220-0036. The current General Plan designation of these parcels is Single Family Residential. The project proposes to change the designation to Commercial. The project also proposes a change in the zoning of both parcels, from the current R-1 (Single Family Residential) to C-UP (General Commercial-Use Permit. The total of project area is approximately 9.15 +/- acres.	Neg	09/13/2006
2005071102	Regional Landfill Options for Orange County (RELOOC) Strategic Plan - Frank R. Bowerman (FRB) Landfill Implementation Orange County Department of Integrated Waste Management Irvine--Orange The proposed project includes: (1) phased vertical and horizontal expansions of the FRB Landfill within the existing property boundary; (2) temporary disturbance outside the property boundary for slope stabilization and remediation, to remediate the effects of the 2002 landslide; (3) an annual average of 8,500 tons per day (TPD) with an increase in the daily maximum to 11,500 TPD; (4) a Soil Management Plan that preserves adjacent canyons by stockpiling operational dirt on the landfill site and (5) provisions to ensure that plant and animal habitats on	NOD

	the landfill property continue to be planned for and protected.		
2005071120	Surcharge for Diversion of Non-Contract Waste Orange County Irvine, Brea, San Juan Capistrano--Orange The A.B. 939 Surcharge for Diversion of Non-Contract Waste would add a surcharge at all three Orange County landfills for the disposal of non-contract/self-haul wastes. The purpose of the project is to encourage businesses to transport self-haul wastes to existing recycling facilities in Orange County, and thereby increase recycling and conserve valuable landfill capacity.	NOD	
2006051051	EA 05-01/Water Well #25 Sanger, City of Sanger--San Joaquin New well for domestic water service.	NOD	
2006062131	Daggett Road Off-Island Rehabilitation Project Stockton, Port of Stockton--San Joaquin The proposed project would widen Daggett Road pavement to approximately 25 feet to provide one lane of travel in each direction and to create 4-foot wide paved shoulders on either side of the roadway within existing ROW. Roadway and shoulder widening would extend from the centerline of the roadway and the proposed rehabilitation efforts would follow the alignment of the existing roadway, with minor shifts in the vertical and horizontal road alignment. North of the BNSF railway crossing the road would be slightly adjusted to align itself with the future reconstructed Daggett Road Bridge. South of the railway the road would follow its traditional alignment to tie in with the improved Daggett Road/SR-4 intersection. Daggett Road would also be resurfaced to repair the current deteriorated condition of the road and roadside drainage ditches would be graded and reconstructed as necessary.	NOD	
2006088129	Carson Creek Levee/Bank Stabilization Fish & Game #2 --El Dorado Removal of understory vegetation and stabilization of an existing bank/levee on the west side of Carson Creek. High flows during the winter of 2005-06 severely eroded the existing levee and at one point, because of built-up understory vegetation in the creek channel, overtopped the levee, causing significant erosion of the bank.	NOE	
2006088130	Field Sampling, Modeling, and Pilot Treatability Testing in Support of the Salton Sea Revitalization and Restoration Plan Salton Sea Authority Unincorporated--Imperial, Riverside In the proposed project the overall goal of this combined natural and treatment plant approach for improving water quality is to return the smaller restored Salton Sea as part of the SSA Restoration Plan into a water body that supports regional recreational and local economic development activities, and to provide safe habitat for wildlife. The outcome of the work described is to better understand water quality and hydrodynamic conditions in the future lake-water system, and to identify the most cost effective technologies for providing the greatest improvement in water quality. 2006088131	Reconstruction of Historic Bale Grist Mill Machinery Parks and Recreation, Department of --Napa Reconstruct historic machinery on the top level of the Bale Grist building. Complete the exhibit including re-assembly of the bolter, associated line shafts, gears, pulleys and belts. All replacement parts will be photo documented as part of the project record. Install upstairs cameras and downstairs video monitor to facilitate visual access to the upper mill area to visitors who may not be able to access the second story mill operations. Install mirrors in strategic locations so visitors on first level can see second level mill operations. Facilitate access compliant with the Americans with Disabilities Act to upstairs mill operations by providing real-time listening systems, binoculars, binder of photos, and a new scale model of the interior mill operation. Construction will only occur from October 1st to March 1st when bats are not present. No modifications will occur to the immediate area where bats are known to roost. Prior to turning on modifications will occur to the immediate area where bats are known to roost. Prior to turning on equipment an evaluation of noise and vibration associated with the machinery will take place during the months of October to February, and will be coordinated with the district Environmental Scientist.	NOE	
2006088132	Del Norte County Illegal Disposal Sites California Integrated Waste Management Board Crescent City--Del Norte Three solid waste illegal disposal sites will be cleaned up using a contractor hired by the California Integrated Waste Management Board. Remediation of the site includes transporting recyclable material and non-recyclable solid waste to appropriate facilities and proper disposal of any hazardous waste.	NOE	
2006088133	Campo Reservation Illegal Disposal Sites California Integrated Waste Management Board --San Diego Two solid waste illegal disposal sites will be cleaned up using a contractor hired by the California Integrated Waste Management Board. Remediation of the site includes transporting non-recyclable solid waste to appropriate landfills and packaging and proper disposal of any hazardous waste.	NOE	
2006088134	Tayawa Illegal Disposal Site California Integrated Waste Management Board --Riverside The site is a solid waste illegal disposal site that will be cleaned up using a contractor hired by the California Integrated Waste Management Board (CIWMB). Remediation of the site includes transporting non-recyclable solid waste to appropriate landfills and packaging and proper disposal of any hazardous waste.	NOE	
2006088135	Replacement Wells for Bradshaw #8 and #9, Golden State Water Company (Previously Southern California Water Company) Health Services, Department of Barstow--San Bernardino Two wells, with substantially the same depth and capacity as the existing well will be drilled to maintain sources of supply for the water system.	NOE

2006088136	Schwan Lake Pennywort Removal Parks and Recreation, Department of --Santa Cruz Mechanically remove Marsh pennywort from the margins of Schwan Lake at Twin Lakes State Beach in Santa Cruz for a period of 10 days to improve water flow through the lake. During this time, mechanical equipment (aquatic vegetation harvesters) will access, cut, collect, and transport cut pennywort material to an offload point where the material will be transferred to shore equipment for off haul and disposal off site. Mechanical equipment will enter and exit the lake adjacent of the existing overflow weir. Once all work is complete, the area will be raked and returned to preconstruction conditions. Project protects natural resources and supports continued use and maintenance.	NOE
